4.5.4. *Currency of proposed rates and prices*

All rates and prices submitted by Proposers shall be in United States Dollars (USD)[currency].

4.5.5. *Breakdown of rates and prices*

For information only, the price needs to be broken down as follows:

No.	Description	Quantity	Unit Price	Total Price

3				
4				
5				
6				
	TOTAL			

4.6. Additional information not requested by IUCN should not be included in your Proposal and will not be considered in the evaluation.

5. EVALUATION OF PROPOSALS

5.1. *Completeness*

IUCN will firstly check your proposal for completeness. Incomplete proposals will not be considered further.

5.2. *Pre-Qualification Criteria*

Only proposals that meet all of the pre-qualification criteria will be evaluated.

5.3. *Technical Evaluation*

5.3.1. *Scoring Method*

Your proposal will be assigned a score from 0 to 10 for each of the technical evaluation criteria, such that '0' is low and '10' is high.

5.3.2. *Minimum Quality Thresholds*

Proposals that receive a score of '0' for any of the criteria will not be considered further.

5.3.3. *Technical Score*

Your score for each technical evaluation criterion will be multiplied with the respective relative weight (see Section 4.4) and these weighted scores added together to give your proposal's overall technical score.

5.4. *Financial Evaluation and Financial Scores*

The financial evaluation will be based upon the full total price you submit. Your financial proposal will receive a score calculated by dividing the lowest financial proposal that has passed the minimum quality thresholds (see Section 5.3.2) by the total price of your financial proposal.

Thus, for example, if your financial proposal is for a total of CHF 100 and the lowest financial proposal is CHF 80, you will receive a financial score of $80/100 = 80\%$

5.5. *Total Score*

Your proposal's total score will be calculated as the weighted sum of your technical score and your financial score.

The relative weights will be:

Technical: 70%
Financial: 30%

Thus, for example, if your technical score is 83% and your financial score is 77%, you will receive a total score of $83 * 70\% + 77 * 30\% = 58.1\% + 23.1\% = 81.2\%$.

Subject to the requirements in Sections 4 and 7, IUCN will award the contract to the bidder whose proposal achieves the highest total score.

6. EXPLANATION OF PROCUREMENT PROCEDURE

- 6.1. IUCN is using the Open Procedure for this procurement. This means that the contracting opportunity is published on IUCN's website and open to all interested parties to take part, subject to the conditions in Section 7 below.
- 6.2. You are welcome to ask questions or seek clarification regarding this procurement. Please email the IUCN Contact (see Section 2), taking note of the deadline for submission of questions in Section 3.1.
- 6.3. All proposals must be received by the submission deadline in Section 3.2 above. Late proposals will not be considered. All proposals received by the submission deadline will be evaluated by a team of three or more evaluators in accordance with the evaluation criteria stated in this RfP. No other criteria will be used to evaluate proposals. The contract will be awarded to the bidder whose proposal received the highest Total Score. IUCN does, however, reserve the right to cancel the procurement and not award a contract at all.
- 6.4. IUCN will contact the bidder with the highest-scoring proposal to finalise the contract. We will contact unsuccessful bidders after the contract has been awarded and provide detailed feedback. The timetable in Section 3.1 gives an estimate of when we expect to have completed the contract award, but this date may change depending on how long the evaluation of proposals takes.

BASELINE STUDY:

Transforming Eastern Province through Adaptation (TREPA) Project.

I. Background

The International Union for Conservation of Nature (IUCN) is a membership Union comprising both State and non-State Members. Created in 1948, it is the world's largest and most diverse environmental network, harnessing the knowledge, resources and reach of six commissions, and its more than 1,300 Member organizations and some 17,000 experts. IUCN finds pragmatic solutions to the world's most pressing environment and development challenges and works with governments, partners, and the international community to mobilize and implement an ambitious global program aimed at restoring the functionality, productivity, and ecological integrity of landscapes for the benefit of people and nature. IUCN's current programming is focused on three areas (i) Valuing and conserving nature; (ii) Effective and equitable governance of nature's use and (iii) Deploying nature-based solutions to global challenges in climate, food and development.

The IUCN Eastern and Southern Africa Regional Office (ESARO) operates in twenty-four countries in the Horn of Africa, East Africa, Southern Africa and the Western Indian Ocean. The current ESARO programming is composed of a suite of mutually interrelated programs and projects designed to address some of the most profound challenges affecting people and nature in the region. Among the projects implemented by IUCN's Eastern and Southern Africa Regional Office is the TREPA Project - Transforming Eastern Province through Adaptation. It is a six-year project, based in IUCN Rwanda Country Office, and funded by the Green Climate Fund (GCF).

The TREPA Project intends to restore 60,000 hectares of drought-degraded landscapes into climate resilient ecosystems through re-forestation, agroforestry, restoration of pasture-lands, and soil erosion control measures in the Eastern Province of Rwanda. In addition, irrigation infrastructure projects in the targeted landscapes of the eastern province will be climate-proofed by the TREPA Project. These projects under MINAGRI could include Export Targeted Modern Irrigation (ETI) in Mpanga (600 hectares) and Mahama (1200 hectares), Kayonza Irrigation and Integrated Watershed Management Project in Kayonza (2000 hectares), Warufu- Mugesera in Gatsibo and Ngoma as well as Rurambi dyke in Bugesera.

The TREPA Project will finally support the national and local institutions to effectively plan, manage and monitor climate adaptation outcomes from improved land use at national and decentralized levels.

The TREPA Project is implemented by IUCN (accredited entity) together with the Rwanda Forestry Authority and Enabel as executing entities in partnership with ICRAF, World Vision, and CORDAID. The Ministry of Environment is responsible for chairing the Project Steering Committee and ensures coherence with national strategies and policies. For implementation of the TREPA Project, three components will be considered namely:

Component 1: Restored landscapes that support climate resilient agro-ecological systems and livelihoods in Eastern Province

Component 2: Market and value chain development for climate resilient agricultural and tree products linked to financial products and services for sustainable management of agro-ecological systems

Component 3: Strengthened enabling environment to effectively plan, manage and monitor climate adaptation outcomes from improved land use at national and decentralized levels.

In order to ensure that the project activities are implemented in the respective Components, the Executing Entities will enter into relevant subsidiary and/or procurement agreements with Service Providers and suppliers of Goods and Services and in respect of Component 3, relevant TA Provider(s) for the relevant Activities.

2. Purpose

The International Union for Conservation of Nature intends to use part of the TREPA project funding received from the Green Climate Fund to carry out a baseline study for the project. The main purpose of the assignment is to determine and document baselines for selected indicators of socio-economic and biophysical outcomes and impacts of the project. The baseline study will cover all the project indicators that do not have reliable existing baseline data. This study will be designed and conducted in a manner such that it will serve as the baseline for a terminal impact study to be carried out in strict compliance to evaluation standards, norms and ethics. Therefore, the study establishes the status of key project parameters and informs specific programmatic/project targets and subsequent performance monitoring and evaluation by project key stakeholders including implementing partners, beneficiaries and development partners.

3. Objectives and Specific Tasks

This section describes the main objective of the baseline survey and outlines the key responsibilities expected from the consultant firm. The objective of the assignment is to collect baseline information for the indicators set out in the project logical framework and Monitoring & Evaluation (M&E) Plan.
