PART 1 – INSTRUCTIONS TO PROPOSERS AND PROPOSAL CONDITIONS

1.1. About IUCN

IUCN is a membership Union uniquely composed of both government and civil society organisations. It provides public, private and non-governmental organisations with the knowledge and tools that enable human progress, economic development and nature conservation to take place together.

Created in 1948, IUCN is now the world's largest and most diverse environmental network, harnessing the knowledge, resources and reach of 1,400 Member organisations and some 15,000 experts. It is a leading provider of conservation data, assessments and analysis. Its broad membership enables IUCN to fill the role of incubator and trusted repository of best practices, tools and international standards.

IUCN provides a neutral space in which diverse stakeholders including governments, NGOs, scientists, businesses, local communities, indigenous peoples' organisations and others can work together to forge and implement solutions to environmental challenges and achieve sustainable development.

Working with many partners and supporters, IUCN implements a large and diverse portfolio of conservation projects worldwide. Combining the latest science with the traditional knowledge of local communities, these projects work to reverse habitat loss, restore ecosystems and improve people's well-being.

PART 2 – TERMS OF REFERENCE

2.1. Background

For over 70 years, the International Union for Conservation of Nature (IUCN), a Membership-based Organisation with global reach, has worked towards a sustainable future for people and nature. Our vision guides us: a just world that values and conserves nature. Drawing on a large and diverse membership, and thousands of volunteer experts of its Commissions, IUCN is focused on the crucial mission of safeguarding our natural world and rebuilding a healthy and equitable planet for people and nature.

The IUCN Centre for Mediterranean Cooperation (IUCN-Med) opened in Malaga (Spain) in October 2001. Within the Mediterranean, IUCN-Med's work is regional across countries in Southern Europe, North Africa and the Middle East. IUCN-Med has the capacity to be present and operate within and across regional political frameworks, mobilizing nature conservation and sustainable development efforts throughout the political and cultural diversity of the greater Mediterranean.

In the marine environment, the degradation and loss of coastal habitats, particularly ecosystems capturing carbon, is resulting in an unprecedented loss of biodiversity and ecosystem services.

Blue carbon is the carbon stored in coastal and marine ecosystems. Coastal wetlands including salt and freshwater marshes, mangrove swamps, tidal and coastal marshes as well as seagrass meadows in the Mediterranean represent significant carbon sinks. Coastal wetlands, regardless of constituting fewer than 5% of the world land area and less than 2% of the ocean, they have almost 50% of all carbon buried in ocean sediments. Indeed, they sequester carbon in its organic form and store it for thousands of years. Moreover, they have an important value for climate change adaptation. However, despite the importance of the multiple ecosystem services provided by wetlands, these habitats are still degrading and disappearing across the Mediterranean.

The project Nature-based Solutions from marine ecosystems in a post-COVID-19 Mediterranean (2020-2023) aims to promote the integration of Nature-based Solutions (NbS) for the Mediterranean marine and coastal environment and fill the missing gaps to promote the inclusion of blue carbon ecosystems in the climate finance mechanisms, encouraging and promoting the value of nature-based solutions from the coastal environment to address climate challenges while conserving biodiversity.

2.2. Scope of the Consultancy

As part of this project on preparing Nature-based Solutions, this consultancy aims to conduct a feasibility field study on the development of sound, investable projects that support coastal habitats in Tunisia by estimating the carbon stocks and carbon fluxes of coastal wetlands located on the Kerkennah islands. The consultancy aims to:

- Estimate carbon stocks and fluxes (e.g. sequestration rates or fluxes) in coastal wetlands and under different conservation conditions on the Kerkennah islands.
- Produce an overall estimation of carbon stocks in coastal wetlands of the Kerkennah islands and future protected area, counting also from other green-house gases emissions and removals.

The consultant(s) will develop this work following the methodology established in the following reference (and references within):

IUCN (2021). Manual for the creation of blue carbon projects in Europe and the Mediterranean. Otero, M. (Ed.), 144pages.

2.3. Methodology

The consultant will propose and discuss with IUCN Med a specific methodology for the development of each phase of the work, based on the key deliverables presented below and overall goal of the consultancy.

The work should include consultations with IUCN-Med staff and, if needed and agreed by IUCN-Med, with external stakeholders.

2.4. Key Deliverables

1. **Detailed methodology and work plan** (including timeline) to be signed off by IUCN-Med, stipulating all activities and deliverables, considering sufficient time for review on behalf of IUCN-Med. This should include the following elements:
 - a) Identifying the area scope (boundaries) and preliminary sampling plan
 - b) Carbon pools (and GHG) to be measured
 - c) Sampling plots characteristics
 - d) Methodology for laboratory and field sampling
 - e) Timeline for the implementation of work
2. **Report of the research study** conducted including the elements indicated below (a-d), a detailed summary in the form of a report with conclusions and all other relevant information as stipulated by IUCN-Med. This will include:
 - a) Site description of the area, conservation status and information related to the threats to seagrass habitats
 - b) Description of the methodology for laboratory and field sampling use to estimate the carbon stocks and fluxes as well any other GHG
 - c) Results of the work conducted in table, word and mapping (GIS and jpg) format following the agreed structured with IUCN-Med. These will include estimations on sediment organic carbon stocks and fluxes, dry bulk density, sediment accretion rate, relevant correction factors.
 - d) Conclusions and recommendations from the results obtained during this consultancy.
3. **Powerpoint presentation** summarizing the work completed, including methodology, main results, conclusions. It is expected this work will be presented in a meeting.

All final decisions concerning the successful delivery and quality of deliverables will be made by IUCN Centre for Mediterranean Cooperation (IUCN-Med). The consultant shall schedule time in the workplan for reviewing drafts and implementing feedback based on discussions with IUCN-Med.

2.5. Supervision and Collaboration

The consultant will work under the supervision of the Programme Manager at IUCN Centre for Mediterranean Cooperation (IUCN-Med). IUCN Med will have the final decision concerning successful delivery and quality of all deliverables. The outline of all deliverables should be agreed with IUCN-Med team ahead of the work. Consultants should build time for discussion before starting each deliverable and for review and sign-off feedback of the different deliverables.

IUCN-Med will provide contact or access to relevant contacts to carry out the assignment.

2.6. Timeline

A time span of approximately 5 months should be considered for this consultancy starting in January 2023 and ending in May 2023. Here follows the list of the deliverables and tentative deadlines:

Del. Nr.	Deliverable	Indicative Deadlines
1	Detailed methodology and work plan	15 days after signature
2	Report of the research study	End of May 2023
3	Power point presentation	End of May 2023

2.7. Profile of the consultants

IUCN is seeking a consultant or team of consultants specialized in carbon sinks and blue carbon. Considering the wide scope of the work area and the short timeframes, it is expected that individual consultants will team up with other experts to ensure the team has:

- In-depth knowledge of the work area topics in the Kerkennah islands;

Consultants are expected to work closely with the IUCN-Med, and be flexible to adapt to changes.

PART 3 – THE EVALUATION MODEL

Proposals will be able to demonstrate specific experience and expertise in ALL topics targeted by the Terms of Reference. The evaluation will be based on the following criteria (in brackets the weight of each component):

Section 1 – Declaration (<i>Section 4.1 in this RfP</i>)		Weight
Q.1	The proponent submitted a signed version of the declaration in due time and conditions	y/n
Section 2 - Technical requirements (<i>Section 4.2 in this RfP</i>)		
Q.2.1	Expertise and Experience of the candidates - <i>based on the CVs, examples of work and technical proposal</i>	35%
Q.2.2	Approach, Methodology and Workplan - <i>based on the technical proposal</i>	55%
Section 3 - Financial requirements (<i>Section 4.3 in this RfP</i>)		
Q.3.1	Financial Offer - <i>based on the Financial Proposal</i>	10%

For the technical evaluation, the following scoring system will be used:

- 5 as “Excellent” / “More than fully compliant/innovative”
- 4 as “Good” / “Fully compliant”
- 3 as “Satisfactory” / “Compliant”
- 2 as “Acceptable” / “Almost compliant”
- 1 as “Unsatisfactory” / “Poorly compliant”
- 0 as “Major concerns” / “Non-compliant”

For the financial evaluation, the scoring will be calculated using the following formula:

- $S_n = S_{max} \times (\text{Lowest offer}/\text{Offer to assess})$,
- Where S_n means the score to be calculated for a specific offer; S_{max} means the maximum score (5 in this case)

Where the scoring method indicates “y/n”, this means that a “yes” answer is required in each case for the Response to be considered further.

The Party subject to a Force Majeure Event shall promptly notify the other Party of the occurrence and particulars of such Force Majeure Event, including how it impacts the performance of its obligations under this Agreement. The Party so affected shall use diligent efforts to avoid or remove such causes of non or delayed performance as soon as is reasonably practicable.

16.3.2 This Agreement may be terminated unilaterally without compensation for any one or more of the foregoing reasons by written notice from one Party to the other.

16.3.3 Notwithstanding the above, the Parties may agree to a suspension or an extension of the Agreement as deemed appropriate. Upon termination of the Force Majeure Event, the performance of the suspended Services shall without delay recommence.

16.3.4 The Party subject to the Force Majeure Event shall not be liable to the other Party for any damages arising out of or relating to the suspension or termination of Services by reason of the occurrence of a Force Majeure Event, provided such Party complies with all the requirements under this clause 16.3.

16.4 Effects of Termination

In the event of termination under this clause, IUCN shall pay the Consultant any outstanding Remuneration in respect of Services performed by the Consultant up until the effective date of termination, it being understood that the total amount payable by IUCN to the Consultant shall not exceed the Remuneration stated in article 5 of the Agreement. The Consultant shall within thirty (30) days of termination, and at IUCN's request:

16.4.1 to the extent possible, complete the Services subject to the Remuneration made available until the date of termination and stop all ongoing activities;

16.4.2 refund to IUCN any advance payments received in excess of the total expenditure incurred as evidenced in the invoices submitted to IUCN,

16.4.3 reimburse IUCN for any expenditures made in breach of the terms of this Agreement; and

16.4.4 submit final technical and financial reports and any other materials, deliverables, works or other outputs created as at the date of termination under this Agreement.

17. APPLICABLE LAW AND DISPUTE RESOLUTION

17.1 The performance and interpretation of this Agreement will be subject exclusively to the laws of Switzerland, excluding its conflict of laws principles.

17.2 Any dispute arising out of or in relation with this Agreement that cannot be resolved amicably by the Parties or by way of mediation shall be submitted to the competent courts of Lausanne, Switzerland.

18. GENERAL PROVISIONS

18.1 This Agreement is the complete understanding between IUCN and the Consultant and replaces all other agreements and understandings in reference to the subject matter of this Agreement.

18.2 Any modification or amendment of this Agreement shall be in writing and shall become effective if and when signed by both Parties.

18.3 This Consultancy Agreement is non-exclusive. IUCN is free to consult other experts in the Consultant's field of specialization.

18.4 This Agreement is personal to IUCN and the Consultant, and neither Party may sell, assign or transfer any duties, rights or interests created under this Agreement without the prior written consent of the other.

18.5 Either Party waives all and any rights of set-off against any payments due hereunder and agrees to pay all sums due hereunder regardless of any set-off or cross claim.

18.6 All provisions that logically ought to survive termination of this Agreement shall survive.

This Agreement may be executed in counterparts, each of which shall be deemed to be an original, but all of which, taken together, shall constitute one and the same Agreement. The Parties agree that the signed counterparts may be delivered by e-mail in a ".pdf" format data file or electronic signature (e.g., DocuSign or similar electronic signature technology) and thereafter maintained in electronic form, and that in this case such signature shall create a valid and binding obligation of the party executing with the same force and effect as if such ".pdf" or electronic signature page were an original thereof.
