

# IUCN SSC Woodcock and Snipe Specialist Group

2018 Report

David Gonçalves

## Chair

David Gonçalves

## Red List Authority Coordinator

BirdLife International

## Location/Affiliation

Research Centre in Biodiversity and Genetic Resources (CIBIO), University of Porto, Campus de Vairão, Vairão, Vila do Conde, Portugal; Biology Department, Faculty of Sciences, University of Porto, Porto, Portugal

## Number of members

140

## Social networks

## Mission statement

The first aim of the Woodcock and Snipe Specialist Group (WSSG) is to provide an up-to-date knowledge on eight woodcock and 18 snipe species in the world. It is also expected to encourage new research and to facilitate contacts between researchers. WSSG plays the role of expertise platform for biologists, conservationists and wildlife managers interested in woodcocks and snipes for share and exchange of information. As these are game species, the final objective is to ensure the sustainable use of the populations.

## Projected impact for the 2017-2020 quadrennium

The group's workshop, held in Pico in 2017, the publication of the respective minutes and the annual newsletter, all contribute to increased knowledge about our target species and their conservation and sustainable management. In this sense, we also perceive an increasingly important role for our members alongside the entities responsible for assuring effective conservation and management. By 2020, we also envisage having new data on the populations of some poorly known woodcock and snipe species from Africa, South America and Asia.

## Targets for the 2017-2020 quadrennium

### Assess

Research activity: improve knowledge on the conservation status of African, South American and Asian woodcock and snipe species.

### Plan

Policy advice: continue working closely with entities involved in hunting management.

### Network

Membership: visit the US to meet American colleagues, strengthen collaboration within the group and recruit new members.

### Communicate

Communication: (1) publish the WSSG Annual Newsletter (numbers 43, 44, 45 and 46); (2) publish the Proceedings of the 8th Woodcock and Snipe Workshop.

Scientific meetings: (1) organise the 8th Woodcock and Snipe Workshop; (2) participate in the 11th American Woodcock Symposium, 24–27 October 2017, Roscommon, Michigan, US.

## Activities and results 2018

Assess

### Research activity

- i.** We started discussing and we have defined the members that will coordinate the component concerning conservation status of Asian woodcock species. (KSR #23)
- ii.** Publication of the annual newsletter of the group (number 44); uploaded in the web site of Wetlands International. (KSR #28)

Common Snipe chick (*Gallinago gallinago*),  
Least Concern
