### 1 Introduction

#### 1.1 The Mt. Elgon Ecosystem

The Mt. Elgon ecosystem is a trans-boundary ecosystem that straddles Eastern Uganda and Western Kenya and is a key resource in both Kenya and Uganda, providing ecosystem goods and services to over 4 million human lives and their livestock. The Mt. Elgon ecosystem serves as a catchment area for the drainage systems of Lakes Victoria, Turkana and Kyoga maintaining water quality, quantity and influencing the economies and livelihoods of communities in western Kenya, eastern Uganda, and the wider Nile Basin ecosystems. The forest mountain ecosystem is the source of critical goods and services that support livelihoods and economic development including provisioning (e.g. food, fiber, fuel, timber, water, and medicine), regulating (e.g. erosion regulation, flood regulation, landslide regulation), supporting (pollination, soil fertility) and cultural (e.g. recreation, cultural heritage). The higher slopes of Mt. Elgon landscape are protected as National Parks both in Kenya and Uganda. Mt. Elgon ecosystem was declared a UNESCO Man and Biosphere (MAB) Reserve in Kenya and Uganda in 2003 and 2005 respectively and is destined to be made trans-boundary MAB conservation area. It also has the status of an Important Bird Area (IBA).

Despite its global, national, and local ecological and socio-economic significance, many areas of the Mt. Elgon landscape are affected by land degradation, deforestation, and forest degradation. Some wetlands and forests have been converted into farms and some riverbanks cultivated. The forest ecosystem is particularly threatened by overharvesting of forest products and encroachment by settlements and for agriculture. Livestock grazing and poaching have equally and substantially reduced the biodiversity and, population sizes of animals are hunted down for meat and other products for traditional use. The main root cause of all this is high population pressure and poverty levels in the wider Mt. Elgon landscape.

#### 1.2 The Mt. Elgon Stakeholders Forum (MESF)

The Mt Elgon Stakeholder’s Forum (MESF) was initiated in 2012, and formerly launched in 2013, with support from a joint programme of International Union for Conservation of Nature (IUCN), United Nations Environment

Programme (UNEP), and United Nations Development Programme (UNDP) and directly coordinated by the Ministry of Water and Environment (MWE) in Uganda.

The main goal of the Forum is to chart ways and means of restoring and, improving the quality and productivity of the landscape in Mt Elgon, to increase its ecological, socio-economic and cultural values and improve the flow of ecosystem goods and services from the ecosystem for local community livelihood improvement, national development and global benefits such as mitigation of climate change impacts, through shared goals and objectives.

The forum brings together both state and non-state actors, as well as the community and individuals that have a stake in the Mt. Elgon Ecosystem/Landscape, providing a platform to discuss and get a common understanding of the issues in the ecosystem/landscape, the various interventions being undertaken by various actors, and developing strategies for harnessing the opportunities available. The good lessons and practices are also discussed and used to design new interventions.

The overall objective of the forum is to promote a landscape approach of addressing critical issues in Mt Elgon where various stakeholders get a common understanding and agree on the various inter-linkages within the landscape to guide strategic interventions that enhance positive change in livelihoods and the ecosystem integrity.

More specifically, the MESF was formed to address the above challenges in recognition of the fact that, several partners have been working in the Mt. Elgon ecosystem/landscape on conservation issues for over twenty years but, the interventions are scattered and uncoordinated, hence affecting the impact of the interventions. The ecosystem also has several thematic working groups which spearhead discussions and learning lessons on key themes within the landscape. However, the thematic working groups are limited to specific stakeholders and issues. The platform was therefore established to close this gap by providing a platform for coordinating all the efforts within the landscape, bringing together all the relevant actors to jointly discuss and generate ideas, solutions, and innovations. The MESF strategic intent, therefore, is to engage more stakeholders and cover wider issues that reflect the interlinkages within the ecosystem.

The forum has a Steering Committee which provides the strategic direction of the platform as well strategic thinking and guidance to the general membership. The steering committee is designed to meet at least twice a year, while the General Assembly is meant to meet at least once a year. However, these meetings have been very irregular and largely depend on availability of funds from well-wishers.

### **1.3 The Strategic Intent**

The long term strategic intents of MESF are to:

- a) Enhance multi-stakeholder engagements for change across sectors, themes and administrative boundaries through the creation of 'coalitions of change' actors. The coalition of change actors will be addressing systemic issues at national and sub-national levels and demanding improvement of quality and quantity of service delivery at sub-national level.
- b) Bridge the micro–macro gap between national-level policy making and sub-national or local-level actions and practices, by working with national and sub-national level entities to make national development policies relevant to local realities.
- c) Have a forum/network that is formally registered, recognised, and respected by both Sub-national and National actors as well as Regional (EAC) actors and is well grounded with knowledge and data on the developments, challenges and opportunities in the Mt. Elgon Landscape.
- d) Pull funding to the sub-national level to facilitate improvement of benefits, service delivery and development at sub-national and local levels from the ongoing national government decentralisation processes and funding systems and on the official development aid chain.

### **1.4 History to the MESF review process**

Since its inception, the forum has been organising annual meetings for the various members to reflect and re-strategize. During its fourth forum event which was held in November 2017, the advisory committee of the forum floated a proposal for endorsement by the general assembly, to formerly register the MESF platform from being a loose network to a formerly registered NGO for easier mobilisation of financial resources to support its operations. However, during the discussions, majority of the MESF members felt that registration as an NGO would make the MESF lose its identity as a loose network and core mandate of coordination. In addition, a concern was raised that registering the platform as an NGO would exclude other key stakeholders such as Government Ministries, Departments, Agencies; and the international NGOs from its membership, as well as compete for funding with members. The meeting requested the steering committee to re-think this decision and explore other avenues for institutionalising the forum without losing its core coordination and representation mandate.

Follow up discussions were held with key stakeholders including IUCN to support this process. As part of the IUCN project, “*Stabilising Land use*” jointly implemented with Uganda Wildlife Authority in Mt Elgon, IUCN was requested to support the re-thinking process with the MESF Steering Committee. It was expected that, this process could revamp and build the capacity of the MESF to take up its role in the Mt. Elgon Landscape. However, this process did not materialise due to limited resources.

During the development of the GEF 7 funded project; “*Promoting Integrated Landscape Management Approach for Conservation of the Mount Elgon Ecosystem in Eastern Uganda*”, this idea was re-visited and the process inbuilt into the project in line with the project’s objective of strengthening Governance Working Groups within the Mt. Elgon landscape, including Catchment Management Organisations (CMOs) to support enhanced landscape level natural resources governance and reconcile conservation and development priorities based on regional, national experiences and lessons learnt.

## **2 Purpose, objective, and tasks**

The purpose of this review is, therefore, to facilitate a process of identifying and developing acceptable recommendations for institutionalising the forum within the scope of its core mandate to perform its functions better, as well as mobilise resources.

The specific objective of this assignment is to support the MESF advisory committee to identify acceptable options for attaining the necessary legal identity for the MESF, which would enable it source for funding, without compromising its core mandate of coordination.

The specific objectives of the assignment include but are not limited to:

- 1) Carrying out an analysis of the enabling environment within which MESF can develop in the national and international context. This analysis will be concerned with policy analysis at the highest levels in government and looking at the socio-economic conditions that can enable or constrain MESF development as well as the legal framework that provides stakeholders with security of legal status and tenure of power brokerage. It will also include an analysis of the institutions and organizations involved in the MESF such as Government Ministries, Agencies and Departments, CSOs, PSOs, DLGs, and others that share common objectives and how these institutions’/organisations’ coming together resonates with national and international aspirations and context.
- 2) Assessing the MESF vision, mission and strategy, culture, structure and competencies, processes (both internal and external), human resources, financial resources, information resources and infrastructure. It is also important to assess MESF interactions with other networks and stakeholders within the wider enabling environment with a view of strengthening partnerships and networks with other like-minded networks for synergy and complementarity.
- 3) Carrying out an assessment of the MESF Secretariat and Steering Committee composition (to define their present capacity within the national and international context) and establish governance baseline.
- 4) Developing in a participatory manner the future desired state and vision of MESF, and identifying the capacity gaps and designing strategies and actions to fill these gaps and achieve the desired goals. In this regard, the areas of focus are: Strategic vision and strategic planning, Leadership, Organizational management and growth,

Resource mobilization, Constituency building/outreach, Programmatic Capacity and Communications Strategy.

The specific tasks of the assignment are to:

- 1) Develop methodology and carry out participatory self-assessment of MESF covering the following issues but not limited to:
  - a. Enabling environment.
  - b. Vision and Mission.
  - c. Strategy.
  - d. Governance.
  - e. Organizational culture and climate.
  - f. Project and Service Management.
  - g. Resource Development.
  - h. Human Resources Management.
  - i. External Relations and Partnerships.

- 3) Analyse and document the findings, results and lessons learnt from the assessment and consolidate with MESF Steering Committee and key stakeholders.
- 4) Based on the findings and results from the assessment facilitate participatory formulation of Action Plan for institutional development based on the core strength of MESF.
- 5) Organize and facilitate necessary support and technical assistance to MESF Steering Committee and Secretariat to start implementing Action Plans.
- 6) Develop baseline database and indicators on institutional and governance capacity of MESF with key indicators for progress monitoring.

### **3 Role of the Process Facilitator and process**

The role of an External Process Facilitator is to conduct an Organizational/Institutional Development (OD/ID) Self-Assessment of MESF through a wide and participatory process of discussions with its membership, Secretariat and Steering Committee and other stakeholders on its current development stage and charting and documenting its future development direction and trajectory.

The Process Facilitator acts as a resource person throughout the process, providing contextual information on specific good governance indicators and using best corporate OD/ID principles, practice (and tools in facilitating the exercise, documenting the assessment process, and assisting MESF to identify the best approaches and actions for meeting its improvement targets in form of: (1) Capacity/Development Needs (2) Capacity Building Plan; (3) Fund Raising Strategy; and (4) Communications Strategy.
