ISSUE 65

2024-2025 Report of the IUCN Species Survival Commission and Secretariat

The IUCN Species Survival Commission (SSC)

The IUCN Species Survival Commission (SSC) is a science-based network of thousands of volunteer experts from almost every country of the world, all working together toward achieving the vision of “a just world that values and conserves nature through positive action to both prevent the loss and aid recovery of the diversity of life on earth.”

Members of SSC belong to one or more of near 200 Specialist Groups, Red List Authorities, Action Partnerships, Task Forces, and Conservation Committees that make up the Network, each focusing on a taxonomic group (plants, fungi, mammals, birds, reptiles, amphibians, fishes, and invertebrates), national species, or a disciplinary issue, such as sustainable use and livelihoods, translocation of species, wildlife health, climate change, and conservation planning.

Framed by the Species Conservation Cycle, SSC's major role is to provide information to IUCN on biodiversity conservation, the inherent value of species, their role in ecosystem health and functioning, the provision of ecosystem services, and their support to human livelihoods. This information is fed into the IUCN Red List of Threatened Species.

2021-2025 Species Strategic Plan

The IUCN Species Strategic Plan encompasses the joint work of the IUCN Species Survival Commission and a number of partnerships to achieve more than 2,700 targets proposed by the Network during the 2021-2025 quadrennium.

To accomplish those targets, the Species Conservation Cycle was established, which is the conceptual framework for the Network activities. The Species Conservation Cycle's main purpose is to guide efforts for valuing and conserving biodiversity through three essential components that are linked to each other:

ASSESS: Understand and inform the world about the status and trends of biodiversity.

PLAN: Develop collaborative, inclusive and science-based conservation strategies, plans and policies.

ACT: Convene and mobilise conservation actions to improve the status of biodiversity.

Their implementation requires two transversal components:

NETWORK: Enhance and support our immediate network and alliances to achieve our biodiversity targets.

COMMUNICATE: Drive strategic and targeted communications to enhance our conservation impact.

SSC Species Report

Annual progress in the implementation of the 2021-2025 Species Strategic Plan is documented in the SSC *Species Report*, which consists of a comprehensive description and analysis of the activities and results generated by the members of the SSC Network and Centers for Species Survival (CSS) each year. Each SSC and CSS group contributes to this document by providing a yearly summarised description of their achievements, which is presented in stand-alone reports.

Structure of the IUCN SSC and CSS Stand-alone Reports

Stand-alone reports summarize the activities conducted and results generated by each group member of the SSC and CSS. Following, is the structure of the stand-alone report and the contents under each session.

Title of the group

Photograph(s) of the Chair/Co-Chairs

Group information

Includes names of Chair/Co-Chairs, Vice-Chairs, Deputy Chairs, Red List Authority Coordinators, Program Officers, Species Survival Directors, and Species Survival Officers, their institutional affiliations, number of members and social networks currently active.

Logo of the group

Mission statement

Includes the mission of the group.

Projected impact for the 2021-2025 quadrennium

Includes the description of the impact on species conservation resulting from the implementation of the targets formulated by the group for the 2021-2025 quadrennium.

Targets for the 2021-2025 quadrennium

Includes the targets planned by the SSC or CSS group for the 2021-2025 quadrennium ordered alphabetically by component of the Species Conservation Cycle. Each target is labeled with a numerical code (e.g., T-001, T-012) that identifies it in the SSC DATA database and its status for the reported year is indicated (Not initiated, On track or Achieved).

Activities and results

Includes the targets for which activities were conducted and results that were generated during 2024 (full year) and 2025 (first quarter), ordered alphabetically, first by component of the Species Conservation Cycle, and second by Activity Category. Description of activities and results includes the indicator that best describes progress, its associated quantitative or qualitative result, and the narrative description of the activity conducted or result obtained. Each activity or result reported is linked to the Key Species Result to which it is mainly associated (e.g., KSR#1, KSR#5).

Acknowledgements

Includes the acknowledgements to funding agencies, partners, and persons who contributed to the progress of the targets of the group.

Summary of achievements

Summarises information of the group’s strategic plan for the quadrennium and progress achieved implementing targets for all the components of the Species Conservation Cycle during the reported year.

Mission statement

The mission of the IUCN Sturgeon Specialist Group is to provide accurate information on the status of sturgeons and paddlefishes and promote their conservation and recovery.

Projected impact for 2021–2025

By the end of 2025, we envision that we will have reached increased protection for sturgeon and paddlefish species. We plan to reach this goal mainly through our support of national and trans-national management and conservation activities. In addition, we will promote efforts to develop and establish state-of-the-art forensic methods for stringent control of international sturgeon trade, e.g. caviar. We predict that jointed awareness campaigns with our close partners from WWF and World Sturgeon Conservation Society (WSCS) will increase knowledge about sturgeon species and their conservation problems among the public, especially the impact of poaching and illegal trade on population declines.

Targets for 2021–2025

ASSESS

T-003 Reassess all sturgeon and paddlefish for the IUCN Red List (27 species and 66 populations).
Status: Achieved

PLAN

T-005 Initiate a Caspian Sea Sturgeon Action Plan.
Status: Achieved

T-006 State-of-the-art conservation action plan for Uzbek Shovelnose Sturgeon (*Pseudoscaphirhynchus kaufmanni* and *P. hermanni*).
Status: On track

NET WORK

T-001 Consolidate and strengthen existing partnerships for conservation of Yangtze Sturgeon (*Acipenser dabryanus*) and Chinese sturgeon (*Acipenser sinensis*).
Status: Achieved

T-002 Consolidate and strengthen existing partnerships for conservation of Sterlet (*Acipenser ruthenus*), Russian Sturgeon (*Acipenser gueldenstaedtii*) and Beluga (*Huso huso*).
Status: On track

COMMUNICATE

T-004 Support Freshwater Conservation Committee communications highlighting freshwater species at risk and threats to freshwater systems.
Status: Achieved

T-007 Raise awareness for conservation of False Shovelnose Sturgeons.
Status: On track

Activities and results for 2024-2025

NETWORK

Synergy

T-002 Consolidate and strengthen existing partnerships for conservation of Sterlet (*A. ruthenus*), Russian Sturgeon (*A. gueldenstaedtii*) and Beluga (*H. huso*). (KSR 4)
Number of governments supported to develop species conservation policies: 1
Result description: In 2024, we initiated a transnational conservation action plan for Caspian Sturgeons.

IUCN SSC Sturgeon Specialist Group celebrated its 30th anniversary in collaboration with the World Sturgeon Conservation Society (WSCS), Bordeaux, France, 2-6 September 2024

Acknowledgements

We thank WSCS and WWF for the support of our initiative of a transnational Caspian Sturgeon conservation action plan. Together with WSCS and WWF has been hosted a meeting at COP14 in Samarkand.

Summary of achievements

Total number of targets for 2021–2025: 7

Geographic regions: 2 Global, 3 Asian, 1 Body of water, 1 Europe

Actions during 2024–2025:

Network: 1 (KSR 4)

Overall achievement 2021–2025:
