

The New 'Big Plan for Nature – What Does it Mean for Business?

CBD Strategic Plan 2011-2020

Dr Jane Smart Global Director, Biodiversity Conservation Group Director, IUCN Species Programme SSC Focal Point

IUCN

Business Case for Biodiversity - Switzerland, April 2011

IUCN The CBD Strategic Plan 2011-2020

- Adopted COP10, Nagoya, Japan
- · IUCN played a significant
- A Vision for 2050, Mission for 2020
- 20 'Aichi' targets (most for 2020)
- · Arranged under five Strategic Goals

IUCN

Vision for 2020: 'Living in harmony with nature'

 'By 2050, biodiversity is valued, conserved, restored and wisely used, maintaining ecosystem services, sustaining a healthy planet and delivering benefits essential for all people.'

IUCN

Business Case for Biodiversity - Switzerland, April 2011

Mission for 2020

• Take effective and urgent action to halt the loss of biodiversity in order to ensure that by 2020 ecosystems are resilient and continue to provide essential services, thereby securing the planet's variety of life, and contributing to human well-being, and poverty eradication; To ensure this, pressures on biodiversity are reduced, ecosystems are restored, biological resources are sustainably used and benefits arising out of utilization of genetic resources are shared in a fair and equitable manner; adequate financial resources are provided, capacities are enhanced, biodiversity issues and values mainstreamed, appropriate policies are effectively implemented, and decision-making is based on sound science and the precautionary approach.

IUCN

Strategic Goal A - Address the underlying causes of biodiversity loss by mainstreaming biodiversity across government and society

- Target 1: Public awareness increased
- Target 2: Values of biodiversity recognized
- Target 3: Incentives reformed
- Target 4: Sustainable production and consumption promoted

IUCN

Business Case for Biodiversity - Switzerland, April 2011

Strategic Goal B. Reduce the direct pressures on biodiversity and promote sustainable use.

- Target 5: Habitat loss reduced
- Target 6: Towards sustainable management of fisheries
- Target 7: Sustainable management (agriculture, aquaculture and forestry)
- Target 8: Pollution reduced
- Target 9: Invasive alien species combated
- Target 10: Pressures on vulnerable ecosystems impacted by climate change or ocean acidification minimized

IUCN

Strategic goal C: To improve the status of biodiversity by safeguarding ecosystems, species and genes

- Target 11: Protected areas increased
- Target 12: Extinction prevented
- Target 13: Genetic diversity maintained

IUCN

Business Case for Biodiversity - Switzerland, April 2011

Strategic Goal D: Enhance the benefits to all from biodiversity and ecosystem services

- Target 14: Ecosystems are restored and safeguarded
- Target 15: By 2020, ecosystem resilience enhanced
- Target 16: Nagoya
 Protocol on Access to
 Genetic Resources and
 the Fair and Equitable
 Sharing of Benefits Arising
 from their Utilization is in
 force.

IUCN

Strategic Goal E. Enhance implementation through participatory planning, knowledge management and capacity-building

- Target 17: National biodiversity strategy and action plan developed
- Target 18: Traditional knowledge respected and reflected in the implementation of the Convention
- Target 19: Knowledge and technologies improved and shared
- Target 20: Financial resources increased

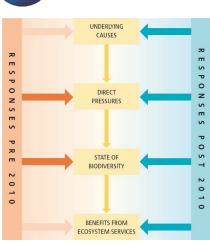

IUCN

Business Case for Biodiversity - Switzerland, April 2011

The Strategic Goals

- A: Address the **underlying causes** of biodiversity loss (mainstreaming)
- B: Reduce the **direct pressures** and promote sustainable use
- C: **Directly safeguard** ecosystems, species and genetic diversity
- D: Enhance the **benefits** to all from biodiversity and ecosystem services
- [E: Enhance implementation through participatory planning, knowledge management and capacity building]

IUCN

The Strategic Plan for Biodiversity 2011-2020

- The Biodiversity related Conventions - CITES, CMS, World Heritage, Ramsar, IPGR
- Agree to use the Strategic Plan for their framework for action

IUCN

Business Case for Biodiversity - Switzerland, April 2011

A flexible framework

- The Strategic Plan provides a 'flexible framework' for the establishment of national targets to contribute to the global targets
- For the first time the <u>sum total</u> of these contributions will being monitored for every COP

IUCN

New partnerships are needed...

- The decision draws attention to the need for new partnerships to ensure implementation
- · Including with the business sector

IUCN

Business Case for Biodiversity - Switzerland, April 2011

IUCN / WBCSD paper to CBD COP10, Nagoya

- Business to support delivery of targets
- Adoption by business will necessitate disaggregation into metrics meaningful for business
- A clear articulation of the elements of the targets that business can contribute to would be a huge boost for the Strategic Plan implementation
