de l'Outre-mer

Dear Europe and world leaders,

I am one of the most endangered iguanas on Earth and can only be found on Grand Cayman Island, a Europe overseas territory in the Caribbean. Many other species found only on small islands, in oceans and on large stretches of land are also vulnerable. The Europe overseas territories from the poles to the tropics are home to a unique diversity of species and ecosystems of crucial global importance.

Together, you can make a difference in protecting this biodiversity.

Find out more and join Europe Overseas Forum at www.iucn.org/euoverseas.

Greetings from Europe overseas,

Grand Cayman Blue Iguana (Cyclura lewisi)

Critically Endangered according to the current IUCN Red List of Threatened Species™
